Forecast for Thursday 29 Oct 2020

Weather: Any showers, wintry above about 900m, slowly dying out. Then a cloudy day with outbreaks of rain spreading northeast through the morning, perhaps preceded briefly by some sleet or wet snow on highest summits. The rain becomes persistent and heavy through the afternoon making conditions underfoot very wet. Rain turning lighter and patchier in the evening.

Chance of cloud free mountain/hill tops above 800m: Around 75% at first with occasional cloud above 750m falling close to zero soon after midday with cloud becoming more persistent above 450m with patches below.

Visibility: Very good or excellent falling to just a few kilometres in heavy rain and any summit snow
